EDUCATION

Manipal University Jaipur

Jaipur, India

Bachelor of Technology in Information Technology; CGPA: 7.66

2023 – Present

- Relevant coursework: Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

SKILLS

Languages: Python, PHP, C++, JavaScript, SQL, Bash, Java

Frameworks: Scikit-learn, NLTK, spaCy, TensorFlow, Keras, Django, Flask, Node.js, LAMP

Tools: Docker, Kubernetes, Git, PostgreSQL, MySQL, SQLite

Platforms: Linux, AWS, GCP, Alibaba Cloud, IBM Cloud, Arduino, Raspberry Pi

PROJECTS

JobShield AI – AI-Powered Recruitment Fraud Intelligence Platform

2026

Python, Scikit-learn, Streamlit, Plotly, NetworkX, SHAP

- Developed an enterprise-grade recruitment fraud intelligence platform combining 7 detection signals – machine learning, NLP, explainable AI, company verification, domain reputation analysis, graph intelligence, and business analytics – to assess job posting credibility and generate actionable fraud risk insights
- Engineered an end-to-end AI pipeline spanning 8 core capabilities, including feature engineering, predictive fraud detection, trust scoring, semantic text analysis, SHAP explainability, interactive BI dashboards, bulk job screening, and real-time risk reporting
- Designed 3 scalable analytics dashboards – covering fraud trend analysis, company risk profiling, and network visualization – to give candidates and recruiters explainable, data-backed decision support

NetGuard – Bandwidth Limiter for Network Users

2025

HTML, CSS, JavaScript, Canvas API

- Simulated per-user bandwidth limiting with the Token Bucket algorithm, supporting configurable burst tolerance and a 4-tier QoS priority scheduler to keep total usage within network capacity
- Rendered a real-time Canvas-based dashboard tracking 3 live metrics – traffic flow, token bucket state, and bandwidth usage – while demonstrating 4 core QoS mechanisms: traffic shaping, policing, weighted fair queuing, and packet dropping

GramSeva – AI-Powered Village Governance Platform

2026

React.js, Node.js, Express.js, MongoDB, OpenAI API

- Developed a full-stack platform serving 2 user roles – citizens who file and track complaints, and authorities who manage centralized resolution – through a shared dashboard
- Secured the platform with JWT authentication and added a multilingual AI chatbot (OpenAI API) so residents could file complaints in their native language

EXPERIENCE

OPM Corporation

Remote

Software Developer Intern

2025

- Architected reusable web application components with a clean, maintainable architecture, following existing code and design patterns
- Profiled application modules and refactored inefficient logic and data-handling paths, cutting load/response time by roughly 8%
- Contributed across the full software development lifecycle, collaborating with a distributed engineering team through agile workflows

Ridlin

Remote

Software Development Intern

2025

- Built and optimized 3 REST API endpoints, improving response times and streamlining backend data handling
- Debugged production issues across the stack, resolving 15+ bugs and improving system reliability and stability
- Collaborated with a cross-functional team using Git and agile development practices, including code review and sprint planning

PUBLICATIONS

Colon Cancer Detection with AI and Clinical Models (*Artificial Intelligence, Medical Imaging*)

2026

- Authored a research paper evaluating machine learning and deep learning techniques for early colon cancer detection from colonoscopy and histopathology images, comparing CNN architectures and transfer-learning models such as MobileNetV2

CERTIFICATIONS

- **AWS Certified Cloud Practitioner (CLF-C02)** – Amazon Web Services (2026)
- **Career Essentials in Generative AI** – Microsoft & LinkedIn (Jun 2025)
- **Career Essentials in Software Development** – Microsoft & LinkedIn (May 2025)
- **Red Hat Certified System Administrator (RHCSA)** – Red Hat (Apr 2025)
- **Database Programming with SQL** – Oracle Academy (Nov 2024)

HONORS AND AWARDS

- Participated in the International Innovation Challenge 2.0 Hackathon, Manipal University Jaipur (Sep 2025)
- Participated in the Hackerzstreet Hackathon, organized by Manipal University Jaipur via Unstop
